Objective

I am an energetic developer who is self-motivated and passionate about improving my knowledge of programing in order to make clean, quality code. My goals are to work on projects, which have an immediate impact on users. I want to continuously learn new tech skills. I have demonstrated the ability to learn and adapt to numerous issues in a professional environment. I am a leader, trainer, and a motivator to all co-workers to help us succeed in obtaining our goals.

Projects

Blogz   October 2018

Created a web application that functioned as a blog site for multiple users. I used Visual Studio Code to set up my coding environment, used Flask to run the application locally, and used MAMP to connect to the application to a SQL Database. Put in user authentication to only allow users who were logged in to enter posts.

Web Caesar   September 2018 to October 2018

Created a web application allowing users to enter in a message and then take the message and encrypt the message using a Caesar cipher. Visual Studio Code was where my coding environment was established and Flask was used to run the application locally.

HTML-Me-Something   September 2018

Created a web page about the St. Louis snowstorm of 1982. Visual Studio Code was the environment where my code was developed creating a responsive design with HTML and CSS.

Initials   August 2018

Created a program where the user inputs their name and the program will tell them their initials. Visual Studio Code was the environment where I created a clean working code with Python.

Experience

Sergeant – St. Louis Metropolitan Police Department   April 2006 - Present

Supervised Officers in various rolls through out the department. Ensured Officers communication skills and Customer Service Skills were current and effective. Handled complex scene supervision. Completed complex internal investigations.
